DUAL BEAM AIMING LASER ADVANCED³

FEATURES AN ADJUSTABLE IR
ILLUMINATOR FOR BETTER ILLUMINATION
AT LONGER RANGES, FULLY ADJUSTABLE
WINDAGE AND ELEVATION, AND HIGH/
LOW POWER MODES

······ OVERALL FEATURES ······

- Integrated push-button switch and remote cable pressure-pad switch activation - tap and release for momentary activation; tap twice for 5-minute continuous ON
- Attaches to any Picatinny rail using the patented, self-adjusting Quick Release HT Mount
- Features two cable ports for remote fire and visible override
- Activation/low battery indicator light

Available in **black** (42095) and **flat dark earth** (42095E)

Fully adjustable windage and elevation

Visible red laser

Dual activation ports for remote fire and visible override

^{*}The figures in the table are for guidance only. Range performance will vary depending on ambient light level, atmospheric conditions, target reflectivity, and imaging system performance. These figures are a composite of tests using the highest power settings performed on a variety of occasions. IR tests used a PVS-14 in starlight with no moon or urban lighting. Visible laser tests were performed in daylight under a variety of lighting conditions.
